

HTML text formatting

1. Print the squares of the numbers 1 - 20. Each number should be on a separate line, next to it the number 2 superscripted, an equal sign and the result. (Example: 10² = 100)
2. Prints 10 names with a line break between each name. The list should be alphabetized, and to do this place a subscripted number next to each name based on where it will go in the alphabetized list. (Example: Alan₁). Print first, the un-alphabetized list with a subscript number next to each name, then the alphabetized list. Both lists should have a level heading.
3. Print two paragraphs that are both indented using the command.
4. Print two lists with any information you want. One list should be an ordered list, the other list should be an unordered list.
5. Prints an h1 level heading followed by a horizontal line whose width is 100%. Below the horizontal line print a paragraph relating to the text in the heading.
6. Print a definition list with 5 items.

HTML link exercises

1. Create some links to various search engines (Google, yahoo, AltaVista, Lycos, etc).
2. Create links to five different pages on five different websites that should all open in a new window.
3. Create a page with a link at the top of it that when clicked will jump all the way to the bottom of the page.
4. Create a page with a link at the bottom of it that when clicked will jump all the way to the top of the page.
5. Create a page with a link at the top of it that when clicked will jump all the way to the bottom of the page. At the bottom of the page there should be a link to jump back to the top of the page.

HTML image exercises

1. Display five different images. Skip two lines between each image. Each image should have a title.
2. Display an image that has a border of size 2, a width of 200, and a height of 200.
3. Display an image that when clicked will link to a search engine of your choice (should be opened in a new window).
4. Display an image that when clicked will link to itself and will display the image in the browser by itself.

NOTE: Include the alt attribute in every Error! Filename not specified. tag in the HTML image exercises.
